

Sunt Petrica Lazar, am 19 ani. La varsta de 7 ani am fost diagnosticat cu hidrocefalee si o hemipareza dreapta. La RMN a mai fost identificata o lordoza acuta cervicala si ventricolul 4 dilatat. Coloana vertebrala avea rotatie de 65 de grade. Amigdalele cerebeloase situate cativa mm sub foramen magnum. S-a infirmat existenta unor tumori medulare. Aveam gatul intepenit si foarte inclinat spre umar, un picior mult mai scurt, mersul topait, echilibru precar. Am aflat de terapia Bowen de pe internet. Am urmat terapia aproape un an si in urma terapiei am constatat imbunatatiri remarcabile:

- gatul nu mai este intepenit si blocat
- am crescut 5 cm
- spatele s-a indreptat foarte mult
- picioarele au o mobilitate mai buna
- lungimea picioarelor s-a mai echilibrat
- pot sa calc pe toata talpa, nu numai pe vatfuri ca inainte
- surpriza a venit in noiembrie cand organismul a gasit supapa sa elimine lichidul cefalorahidian prin urechea dreapta. Simteam ca se incalzeste ceva in nas, iar apoi cobora mult lichid limpede prin ureche, in nenumarate rinduri.

Ma simt excelent, sunt optimist in ceea ce priveste insanatosirea mea .

P.S. Am luat examenul de conducere, iar acum sunt in cel de bacalaureat.

*Iulie 2014*

My name is Petrica Lazar and I am 19. At the age of 7, I was diagnosed hydrocephalus with a hemiparesis on the right side. The MRI also revealed an acute cervical lordosis and the 4th ventricle dilated. My spine had a 65 degree rotation. My cerebellar tonsils were situated just a few mm under the foramen magnum. No medullar tumors were found. My neck was very stiff, and bent over my shoulder, one leg was much shorter, I had a hopping walk and a precarious stability. It is on the internet that I found out about the Bowen therapy. I was delivered the therapy for almost one and half years, and grace to it remarkable improvements were registered:

- my neck is no longer stiff and blocked
- I grew up by 5 centimeters
- my legs have a better mobility
- the length of my legs appears to be more levelled
- I can step on my entire sole not only on the toes as before
- but the surprise came in November when my body found the „valve” to throw out the cerebrospinal liquid through the right ear. I was feeling something getting warm into my nose and then, on many occasions, a lot of clear liquid ran out through my ear.

Now I am feeling great and am very optimistic with regard to my healing.

PS – I took my driving license and now I am doing my bacalaureate (bachelor).
